

Bram van der Werf

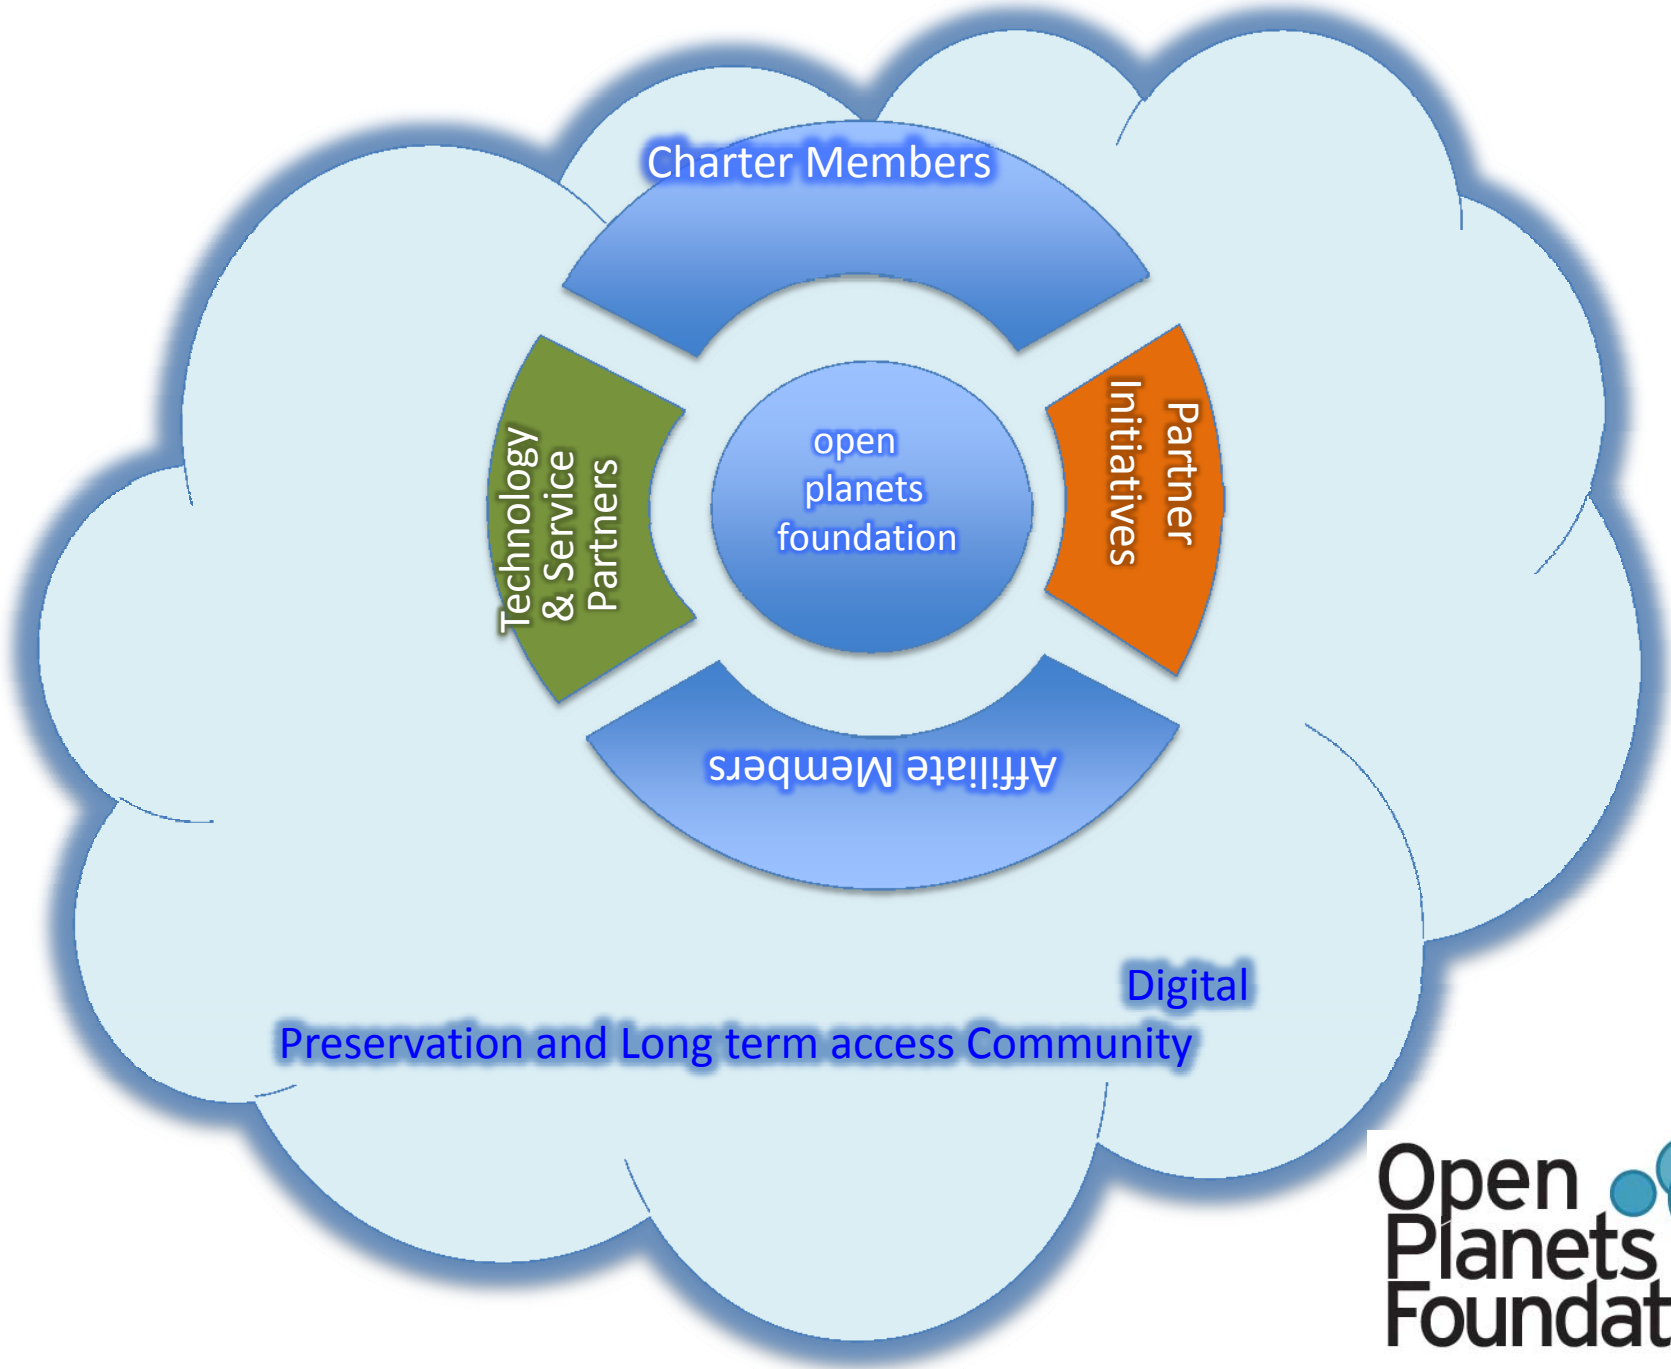

Why OPF?

- Today major memory institutions, despite being the major stakeholders and thought leaders in the field of long term access and digital preservation, suffer from fundamental lack of mature tools and production services
- Commercially available standard solutions do not fit the specific requirement for a long-term strategy while bespoke custom made solutions are too costly

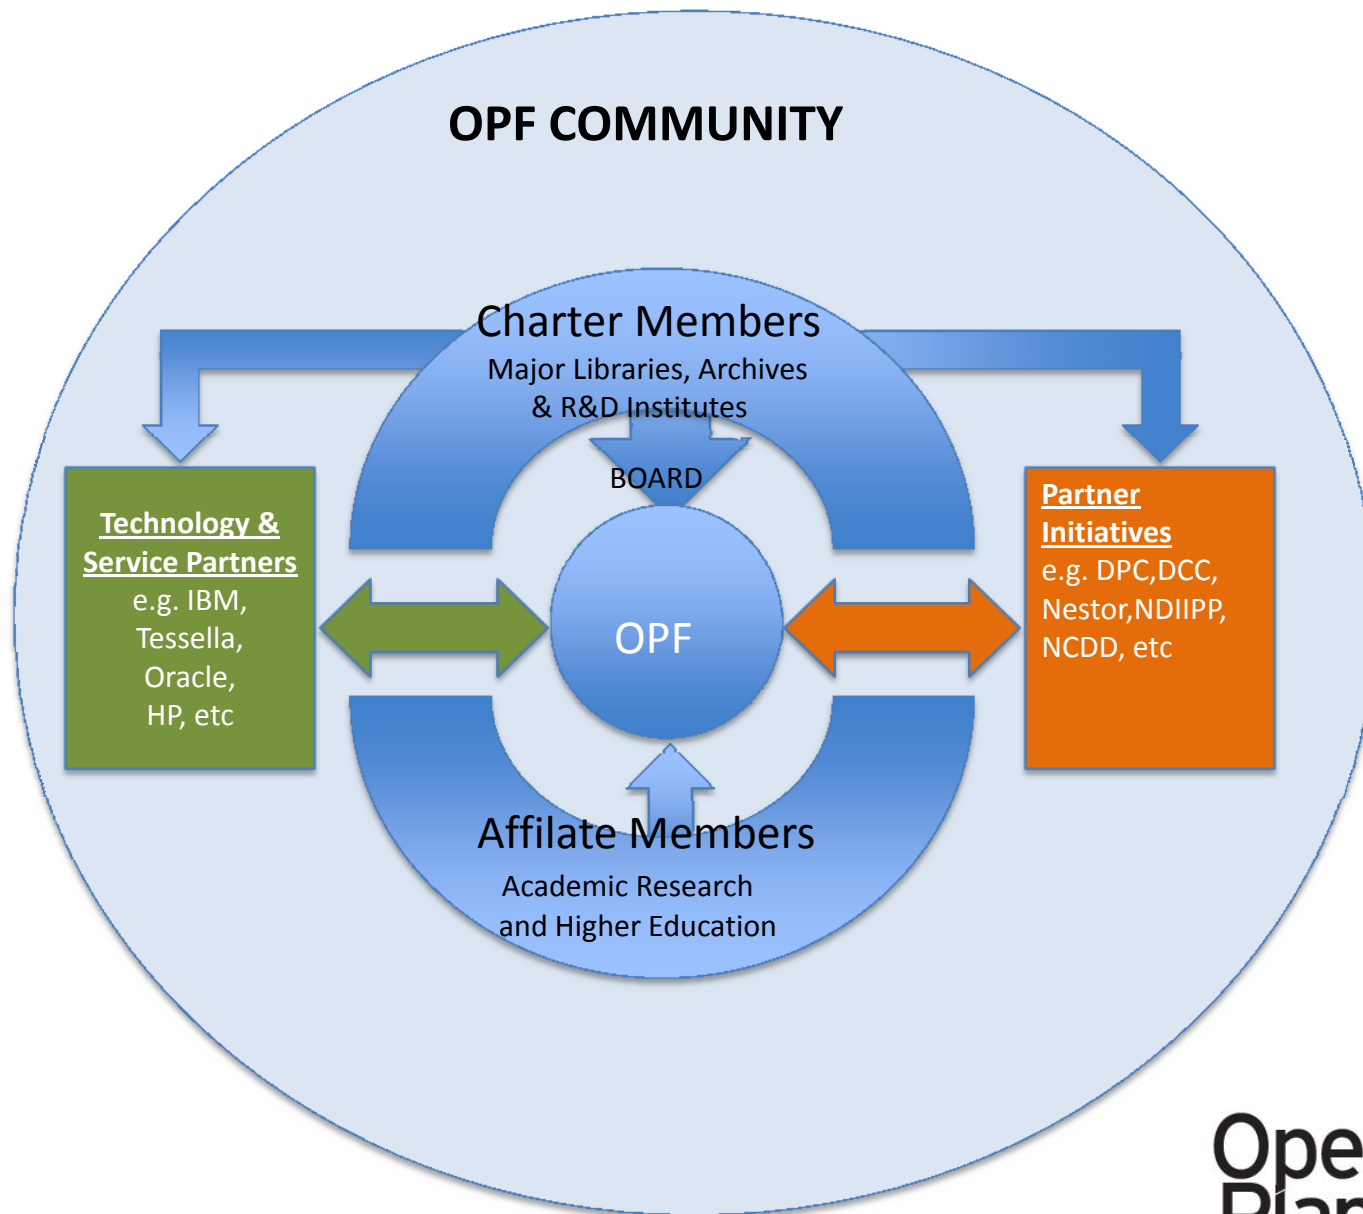

Who are OPF members, partners and community

- Chartered Members (Not for Profit)
- Chartered Members (Others)
- Affiliate Members
- Technology Partners

- Others....

Digital
Preservation and Long term access Community

OPF Products & Services

- Meet digital preservation needs of archives and libraries at national scale.
- Are focused on practical solutions.
- Provide functional products and services, which are open, extensible and non proprietary.

OPF provides stewardship

- Assure development & maintenance of a comprehensive DP suite (Requirements)
- R&D outcome, mature prototypes & demonstrators (Process e.g. RUP, SCRUM)
- Support relevant Open Source initiatives
- Academic Research & Higher Education, work on an academic HE curriculum for DP
- Promote partnerships (technology & services business), take-up and sustain
